All proceeds will go directly to the Central Ohio Chapter of the Huntington's Disease Society. This is a fatal, hereditary disease that currently has no cure or treatment. The funds will support the research for treatment and for social services that assist families who are dealing with the disease and for those families that are at risk for inheriting the disease. Children of parents who have the disease have a fifty percent chance of inheriting the Huntington's gene. Help us make this the last generation that has this devastating disorder. Please visit www.hdsacentralohio.org for more information on how your contribution will be used.
